CSS JavaScript TypeScript Python React React Native Redux Node.js MongoDB Git

GitHub Postman Flask AWS MySQL PostgreSQL

EXPERIENCE

FULL STACK DEVELOPER, Berkeley, CA

WISDM, January 2023–Present

<https://wisdm.webflow.io>

- Designed and implemented Wisdm's backend API using **Python, Flask, Flask-SocketIO, PostgreSQL, and Koyeb DB**, including real-time data handling for interactive features.
- Built the **messaging and notification systems from scratch** across both frontend and backend, enabling real-time communication and event-driven updates.
- Developed the **second-iteration web app** using **React, TypeScript, and Redux Toolkit**, improving scalability and performance for dynamic social features.
- Created the **first-iteration mobile app (React Native + Redux)**.
- Coordinated with the **UI/UX team in weekly design sprints**, ensuring feasibility, technical alignment, and smooth user flows.
- Partnered directly with the **CEO** to define technical direction, manage milestones, and prioritize deliverables in a fast-moving startup environment.
- Continuously **adapted to product pivots and emerging industry trends**, quickly learning new frameworks and tools to keep Wisdm competitive.
